

Installation Phases - Selected Area

1

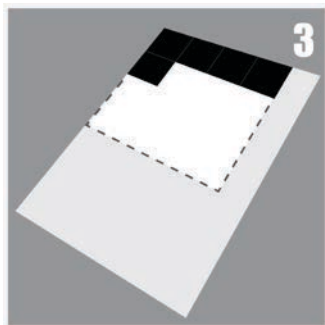

1. Select the installation area.

2

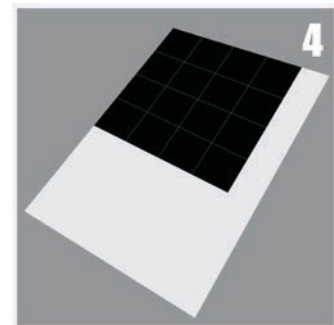

2. Lay the first tile in the angle.

3

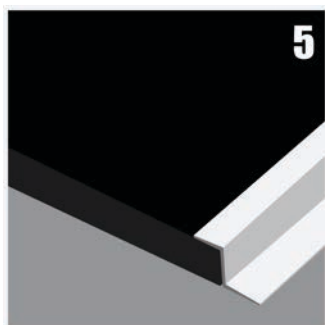

3. Finish the first row and start the second following the same installation direction

4

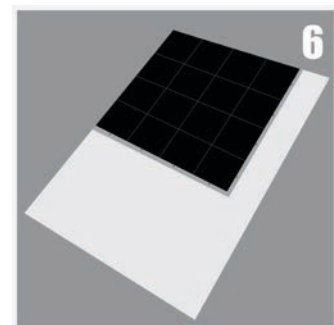

4. Cover the area and verify the final alignment.

5

5. Use a containment perimeter to protect the sides that don't lean against the walls.

6

6. Secure the perimeter on the tiles.
